# INFO

- The bot can handle any school office work.

- The screen on the bot will show the translation of the things that the bot is talking about.

- It has speaker and a mic to hear what the person is saying it also translate what the person is saying using google translate for it self

- It moves using wheels which is under a platform

- It recognizes the people like Students HM,Principle,CEO,etc; using camera

- It shows the info of the students if you enter the admission number or name,like fees to pay ,things you bought and the bills of the thing that you paid for.
- It has sensor to understand that a a wall or any thing is near it

- **The bot can be in manual and automatic mode so school can manually control the bot using alif bot app**
